

12.2 Operational measures

12.2.3 CU as a body have a policy, process or practice on waste disposal - Covering hazardous materials.

Cairo University has processes and public reporting that indicate it addresses waste disposal, including hazardous materials:

- 1- **The 1 st evidence** is CU's **Sustainability Report 2024** includes a section on waste with a specific line item called "Hazardous Waste Management" giving it a status of "Complete" (scored 1.00/1.00) alongside other waste-categories. P. 23-24.
 - The report discusses "Waste - Minimization and Diversion; Construction & Demolition Waste; Hazardous Waste Management" as categories. This implies that CU is tracking hazardous waste and has a system in place for its management.
- 2- **The 2 nd evidence** is thea **press release** about the Supreme Council of Universities (SCU) meeting hosted by CU in December 2023 discussed (safe handling and integrated management of hazardous waste) and approved a model classification of waste (organic, inorganic, chemical, electronic).
- 3- **The 3rd evidence** is link of **a press release** in a previous report of CU's hospitals it was documented that the hospital specifically addressed" (hazardous medical waste) and that CU hospitals are implementing steps to manage medical/hazardous waste (e.g., training staff, waste-bags, safer disposal) in cooperation with the Ministry of Environment.
