

13.3 Environmental education measure

13.3.4 CU as a body informs and supports local or regional government in local climate change disaster/risk early warning and monitoring.

Government agencies are engaging Cairo University for monitoring and environmental-risk work (which is related to early warning):

- 1- **The 1 st evidence:** A news article reports that the Egyptian Cabinet approved a contract with Cairo University to raise the efficiency of ambient-air-pollution monitoring stations through the university's Center for Risk Reduction and Environmental Studies and Research at CU. This contract covers the national network of air-pollution monitoring stations.
- 2- **The 2 nd evidence:** A lecture organized by the Institute of National Planning for 2023-2024 titled "Interaction between data-science and Earth-observation for early-warning systems" was delivered by a professor from CU.
- 3- **The 3rd evidence:** An article mentions that the Ministry of Environment of Egypt visited the "Centre for Risk-Reduction" at CU which runs air-quality monitoring and early-warning systems for pollution.
