

14.3 Supporting aquatic ecosystems through action

14.3.1 CU as a body supports and/or organizes events aimed to promote conservation and sustainable utilization of the oceans, seas, lakes, rivers and marine resources.

CU supports and/or organizes events aimed to promote conservation and sustainable utilization of the oceans, seas, lakes, rivers:

- 1- **The 1st evidence:** the report of the faculty of veterinary Medicine CU, 2024. See p.1.
- 2- **The 2nd evidence:** Student projects, research and general community-service activity by the Faculty in 2023–2024 (courses, vocational trainings, exhibitions and aquaculture/fish-health training).
- 3- **The 3rd evidence:** Participation in national water events — CU / faculty staff participate in broader water events (Cairo Water Week, workshops) that include freshwater/coastal topics. Such events are multi-partner and CU is a participant rather than clearly the lead organizer for marine-conservation outreach.
