History of Faculty of Computers and Information,cairo university

The faculty has been constructed on 1996 – 1997 , it accepts the graduated students from the final secondary stage that have been successfully passed both physics and mathematics subjects

Mission of Faculty of Computers and Information,cairo university

The Faculty is committed to providing high quality under-graduate and graduate informatics education that benefits students and society. This is done through continuous improvement of the curricula, emphasis on quality, and integration of research, teaching and learning activities.

The Administration : to enhance the faculty infrastructure and administration performance to support its educational, research and societal activities. Meanwhile, the Faculty will endeavor to attract private and public funding.

The Students : to be prepared for professional practice to increase their employability and to be competitive at the national, regional, and international levels. This will be achieved through solid foundational knowledge in the information, communication, and decision support disciplines, basic and specialized training, and improved soft skills.

The Academic Staff : to conduct research, integrated with education, in selected areas of excellence that are technologically important and relevant to our society. They will work with business, industry, and academia to exploit their research and development capabilities, where research priorities are linked to socio-economic needs of the society.

The Faculty aspires to become recognized at the national, regional and international levels as one of the best in informatics education and research.
